ENVIRONMENTAL POLICY

At Zycon, we are committed to protecting the environment where we work by maintaining good environmental and ethical conditions and practices, investing in eco-friendly equipment to minimise emissions, and reducing the effect on both the environment and the people.

Furthermore, our philosophy of achieving this is to ensure that all waste we generate during our operations is safely disposed of in the most environmentally friendly manner.

Consequently, the management of Zycon Consulting Limited shall support and promote an environmentally friendly culture by ensuring that:

- All wastes we generate during our operations are disposed of safely
- We encourage waste recovery and re-use
- We encourage a clean and tidy working environment at all times
- We protect and care for the environment and make it a core value
- Our operations do not contradict any statutory environmental regulations
- We work with equipment and vehicles that are environmentally friendly
- We provide our staff with a safe working environment
- We carry out our operations in the safest and most environmentally friendly manner
- We assess our work and improve the working environment
- We prevent spills into the outside environment at all times
- We prevent adverse impacts on the environment and communities surrounding wherever we are working
- We comply with all environmental safety contract procedures and requirement
- We perform periodic reviews of our environmental targets and set new targets where necessary
- We continuously work towards improving our environmental performance and processes
- We will minimise the generation of waste throughout our business footprints and develop consistent waste recycling techniques
